

SNOWWHITE lens for LUXEON PWT

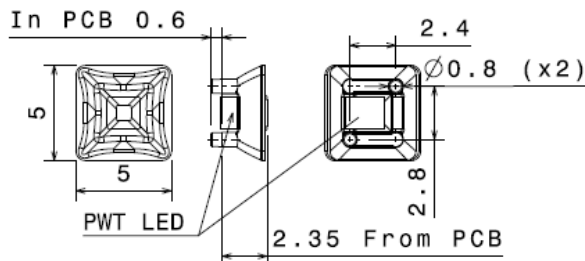

- **LEDIL F'FORM SnowWhite** lens is made of optical grade PMMA (acrylics) with high UV and temperature resistance (105°C/220°F) to ensure excellent optical properties as well as long-term material stability and durability.
- Use with Luxeon Portable PWT LED, ordering code LXCL-PWT1
- The illumination pattern of the **SnowWhite** lens is rectangular. Within the rectangular area illumination intensity is very even leaving no dark corners nor other areas with less luminous intensity.
- High optical efficiency, >80%
- No lens holder. Fastening to heat sink with glue, accurate positioning with 2 legs going thru PCB

SIMULATION DATA

NAME	ORDERING CODE	FWHM Angle
SNOWWHITE	SNOWWHITE (n. 10537)	±18° x ±24°
